

WEB AND MOBILE CONSULTING

NCN Technology is committed to delivering successful projects that solve your business problems and developing long-term working relationships.

WEB

NCN's web development team follow agile methodologies and utilize different technologies such as HTML5, Word Press, PHP, Joomla, Drupal, Java, SQL, .Net, Python and more to create feature rich applications to fulfill business needs.

- Websites for businesses and non-profits of all sizes with beautiful and user friendly interfaces.
- Custom applications to manage schedules, field members, data integration, automation, form creation and reporting.
- Web Application upgrades to the latest technologies.
- Business analysis, Requirement gathering, Prototyping, IT project management and testing.

MOBILE

NCN Mobile subject matter experts specializing in iOS, Android and Windows standard development kits as well as Xamarin and Phone Gap cross platform solutions. Sample apps include:

- Domain experts in Enterprise mobile inspection applications to automate paper processes, increase productivity, improve reporting and reduce costs.
- Enterprise mobile apps to improve client experiences.
- Geo-location.
- Social media with user chat features.
- Live video and music streaming apps.
- Data streaming apps for utility companies with alerts.
