Sample Past Performance

United States Naval Observatory Website Architecture Project

NCN was tasked with developing the requirements documentation, creating the architectural and system design, developing the configuration management plan, creating the test plan and designing the prototype. January 2019- Present.

Wisconsin.gov Website

NCN Technology provides the lead SharePoint Architect to manage and maintain the Wisconsin State Portal, built on the SharePoint 2013 platform. This work is performed as a subcontractor. NCN's Architect manages the infrastructure and defined the support procedures to effectively communicate between internal team members, upper management and support staff. Support from 2013 – Present.

Army Contracting Command – Business Administration Support Services

NCN Contract and Acquisition Professionals provide a myriad of tasks to support the ACC APG Belvoir contracting office. Support from September 2017 – Present.
